Nationality
Indian

Total Work Experience
8 years 9 months

Language
English, Tamil, Hindi & Malayalam

Address:
Dubai, United Arab Emirates (UAE)

ABOUT

Highly skilled and detail-oriented Planning Engineer with over 8.5 years of experience in construction project management across India and the GCC. Proven expertise in scheduling, resource optimization, and project controls using tools like Primavera P6, MS Project, ASTA Powerproject, and SAP. Adept at managing large-scale civil & commercial ensuring timely delivery within budget and quality standards.

EDUCATION

Bachelor of Engineering - Civil
Anna University | 2016

Master Of Engineering - Construction Engineering & Management
Anna University | 2019

PROFESSIONAL EXPERIENCE

Plus Palace General Contracting LLC
Engineer – Planning | Dubai, UAE | May 2026 – Present

- Leading Planning engineer for multiple projects; mainly working on 'Eden Hills' — an AED 600 million luxury development comprising 18 villas, and the Ayah residential building tower — handling end-to-end planning and project controls from inception through execution.
- Preparing and establishing the project baseline schedule in Primavera P6, including work breakdown structure, activity sequencing, resource and cost loading in line with the contract programme.
- Preparing and substantiating Extension of Time (EOT) claims and associated delay analyses, along with variation and prolongation cost claims, to protect the contractor's entitlement.
- Drafting and issuing contractual correspondence and notices to the client and consultant in accordance with the conditions of contract, and maintaining a register of all contractual communications.
- Conducting and facilitating weekly progress and design review meetings with the client, consultant, and site teams to track schedule adherence, resolve bottlenecks, and agree recovery actions.
- Preparing comprehensive monthly progress reports covering planned versus actual progress, S-curves, productivity analysis, and look-ahead schedules for management and client review.
- Carrying out regular Primavera P6 schedule updates, capturing actual progress, revising forecasts, and issuing catch-up and recovery plans to keep the project aligned with the baseline.
- Developing and maintaining the project risk register, identifying schedule and cost risks, assessing their impact, and coordinating mitigation measures with the project team.
- Coordinating closely with the procurement and technical teams to align engineering deliverables and material procurement with the construction programme, ensuring long-lead items and approvals are secured ahead of site requirements.
- Preparing weekly look-ahead schedules and circulating them by email to the project stakeholders, highlighting upcoming activities, critical milestones, and required resources to keep all teams aligned on priorities.
- Performing resource and manpower histogram analysis and productivity monitoring to ensure adequate mobilisation, level workloads, and forecast requirements against the planned programme.
- Analysing schedule performance through earned value and progress S-curves, identifying critical and near-critical activities,

and advising management on corrective actions to recover any slippage.

- Defining and monitoring project Key Performance Indicators (KPIs) — including planned versus actual progress, schedule performance index, productivity, and milestone achievement — and reporting them periodically to management to track project health and support data-driven decisions.
- Preparing and submitting periodic progress reports to the consultant and client, presenting schedule status, achieved versus planned progress, and key concerns in review meetings to keep all parties informed and aligned.

Sobha Construction LLC

Engineer – Planning | Dubai, UAE | February 2025 – May 2026

- Leading planning engineer for high-end Luxury 110 villas include beach front villas and commercial projects in Dubai.
- Developing and maintaining baseline schedules and tracking with cost using Primavera P6 and providing catch up plan.
- Conducted delay analysis and implemented risk management strategies to mitigate project disruptions and ensure timely delivery.
- Coordinating with design, procurement, and execution teams to ensure timely deliverables.
- Preparing and updating trackers for units, shell, envelope, and design progress.
- Managing approvals and documentation for regulatory bodies including Dubai Municipality, DEWA, BCC and RERA.
- Conducting weekly design review meetings and site audits to ensure compliance and progress.
- Reporting project status to senior management and stakeholders through ppt, Power BI and dashboards.
- Monitored and recorded daily revenue metrics, ensuring alignment with business targets and operational performance.
- Contributed to the formulation and execution of business plans, supporting strategic growth and operational efficiency.
- Participated in development and review meetings with the Managing Director's office team, collaborating with two subordinates to track progress and resolve planning issues.
- Coordinated with cross-functional teams to track project stamps from PlanGrid through to "Keep Out" stage, ensuring compliance with quality standards.
- Liaised with the Quality Assurance team to validate project documentation and readiness for handover.
- Coordinated with authority teams for DM-related inspections including DEWA, water, power and network connections.
- Collaborated with infrastructure team for completion of pathways, asphalt roads, and FIC Connections.
- Facilitated smooth handover of completed units to the CRM team, ensuring all planning and quality checkpoints were met.
- Built and circulated weekly look-ahead programmes and catch-up plans in Primavera P6, comparing actual progress against the plan and initiating corrective measures on critical-path activities.
- Carried out manpower and resource histogram reviews to balance workloads and project future requirements, keeping site mobilisation in step with the baseline programme.

Total Environment

Assistant Manager – Planning | Bangalore, India | November 2022 – January 2025

- Worked in cPMO (Corporate Project Management Office) on 'Over the Rainbow – VILLAS' of site area 30 acres, and new launching projects 'Suntikoppa – VILLAS' of site area 75 acres and 'Donapaula (Goa) – RESIDENTIAL & COMMERCIAL' of site area 12 acres.
- Launch Schedule, Construction Schedule & Design Schedule of the Projects using ASTA Powerproject and getting approval from respective project heads and tracking the same as per the baseline.
- Preparing Unit tracker, shell tracker and envelope tracker and getting updated through site planning engineers.
- Preparing Design Fee Schedule (as designed by inhouse) based on the package & assigning quarterly goals for the architects and follow up to complete their goals
- Updating DMS regarding drawing transmittals, QS, accounts, site related all documents
- Arrangement of design review meetings weekly with architects and site team to get the drawings as per site criticality & drawing queries if any.
- Approvals tracking with real estate team during construction & pre-post construction (Building Plan Sanction, Water Supply Board Approval, Power Approval, Consent for Establishment (CFE), RERA, Commencement Certificate, RERA quarterly update, Water Supply – Permanent Connection, Power – Permanent Connection, Consent for Operation (CFO), Occupancy Certificate).
- Conducting regular site audits on quarterly basis regarding documentation of drawings, GRN, pour cards, calibration certificate, gate pass, all quality & billing related documents
- Responsible for maintaining records of the stakeholders' chart, experience home tracker, production reports, approval trackers, customer tracker of our respective projects
- Responsible for maintaining records of the Daily Progress Report (DPR), Monthly Progress Reports (MPR), Daily Labor Reports (DLR) and other reports receiving from site planning engineers
- Providing training to the site planning engineers to update the actuals, cost and other updates for • their respective projects. Reviewing the planning and scheduling of work on current projects to ensure that activities are effectively planned, resourced, and completed.
- Updating the sprint and marathon dashboard to get the overall slabs, finishing activities, unit handover happened on that quarter of all projects to get the production.
- Preparing and tracking launch, construction, and design schedules using ASTA Powerproject.
- Conducted site audits and maintained stakeholder records and progress reports.

Sobha Limited

Senior Engineer – Planning | Bangalore, India | November 2021 – October 2022

- Worked in 'SOBHA ROYAL PAVILION – SUPER LUXURY & LUXURY APARTMENTS' of Super Built-up Area 22.25 Lakhs Sq.ft with 16 Towers (2B+G+18).
- Projection of Cash flow, Cement requirement, RMC requirement, Steel requirement, SIL & SGML on monthly basis and submission of the reports to head office for approval.
- Material procurement (Structural & Finishing) – A & B class materials, Consumable by getting estimation followed by PR and PO procedures.
- Arrangement of planning meetings weekly to discuss Target vs Achieved schedules and material, labor requirements to complete weekly targets.
- Reviewing the planning and scheduling of work on current projects to ensure that activities are • effectively planned, resourced, and completed.
- Preparing reports of RERA, Subcontractor Resource Management (SCRM), Department of Technical • Manpower (DTM), Cumulative Delay Report, Finishes tracking and getting approval.
- Management of Power tools accessories and machines – procuring from Central Workshop (CWS) and allocation to site team.
- Work in conjunction with the Planning Manager and project leader in the development of overall • project procurement strategy, sequencing, phasing and logistics.
- Making Material Movement Request (MMR), Asset Verification, drawing tracking on Enterprise Resource Portal (ERP).
- Also creating Work Order and Disposal Request for sub-contractors, preliminary activities, and Scrap disposals.

Larsen & Toubro Construction

Engineer – Planning | Tirunelveli, India | May 2019 – November 2021

- Worked in 'PROVIDING UNDERGROUND SEWERAGE SCHEME TO TIRUNELVELI MUNICIPAL CORPORATION – PHASE II', Tirunelveli.
- Arrangement of planning meetings weekly to roll out the agreed work breakdown structures and working methods to the various planning contributors.
- Managing sub-contractors from vendor code creation followed by providing work orders up to bill crediting.
- Loading reports and clearing the queries on Enterprise Information Portal (EIP), an L&T related software.
- Taking responsibilities on Plant & Machinery assets (more than 30) from TNTP provisions and following up to billings.
- Responsibilities on reporting client (Tirunelveli City Municipal Corporation) about project hurdles and clearing the hurdles.
- Preparing and updating the project construction schedule, monitoring physical progress against the baseline, and preparing catch-up plans to recover any slippage on critical activities.
- Preparing look-ahead programmes and weekly work schedules for the various work fronts, coordinating with site engineers to ensure resources, materials, and manpower were mobilised in line with the plan.
- Tracking material and machinery requirements against the programme and coordinating with the procurement and stores teams to avoid schedule delays due to shortages.

KEY SKILLS

- Primavera P6
- Microsoft Power BI
- Microsoft Office (Excel, PowerPoint, Word)
- Asta Powerproject
- MS Project
- SAP
- AutoCAD

Certifications & Training

- Participated in and presenting a paper about Impact of GST and Demonetization in Construction Industry in “International Conference on Advances in Sustainability of Materials and Environment” at St. Xavier’s Catholic College of Engineering on 4th and 5th April 2019.
- Participated in “National Workshop on Application of Primavera in Civil Engineering” at St. Xavier’s Catholic College of Engineering on 12th October 2017.
- Participated in “National Conference in Advances in Civil Engineering” (NCACE T16) at C.S.I. Institute of Technology on 1st April 2016.
